It does not include inventory, special tools, leased property, or returnable containers.

(f) "Critical spare parts" means parts that are maintained for possible future replacement of parts in use in

operating equipment. Critical spare parts are maintained on site, sometimes for a considerable period of time, to avoid a disruption of production if replacement of a failed part cannot otherwise be made immediately.

(g) "Depreciable personal property" means all personal property as defined in subsection (k), that is used in a trade or business, used for the production of income, or held as an investment that should be or is subject to depreciation for federal income tax purposes, except to the extent that property is treated otherwise in this article.

Special tools include, but are not limited to, tools, dies, jigs, fixtures, gauges, molds, and patterns. Depreciable tangible personal property shall qualify as special tools only if assigned a special tools asset class from Appendix B of IRS Publication 946 and depreciated as special tools for federal tax purposes. A return may cover all business locations in a single taxing district. However, if the property is located in two (2) or more taxing districts within the same township, a separate return must be filed reporting the property in each of the taxing districts.

The return form as provided in subsections (a) through (b) does not constitute a return unless it is signed under the penalties of perjury by a person authorized to file such return. (*Department of Local Government Finance; 50 IAC 4.2-2-9; filed Dec 7, 1988, 9:35 a.m.; 12 IR 824, eff Mar 1, 1989; reinstated by IC 6-1.1-3-22, eff Jul 1, 2003*)

SECTION 16. 50 IAC 4.2-2-10 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-2-10 Penalties

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1

Sec. 10. (a) ~~Perjury~~. Willful failure to file a true and correct return. Any person who willfully makes and subscribes any return, statement, or other document which is verified under oath, which is certified as to the truth of the information ~~occurring thereon~~ **contained therein**, or which contains a written declaration that is made under the penalties of perjury and which ~~they~~ **he or she** ~~do~~ **does** not believe to be true and correct in every material respect shall be guilty of a crime and shall be subject to the same penalties as provided by law for perjury.

(b) ~~Incomplete return penalty~~. If a person subject to IC 6-1.1-3-7(c), fails to include on a personal property return the information, if any, that the ~~state board~~ **department** requires under IC 6-1.1-3-9 or IC 6-1.1-5-13, the county auditor shall add a penalty to the property tax installment next due for the return. The amount of the penalty is twenty-five dollars (\$25). The purpose of this penalty is to require a full disclosure of the information related to the value, nature, or location of personal property on the personal property tax return for that year which is necessary for an assessing official to review the return. If this information is not provided, a thorough review of the return as required by law cannot take place.

(c) Penalty for failure to file a timely return. Failure to file a return or be granted an extension of time to file a return by May 15 as

required by law will result in the imposition of a twenty-five dollars **dollar** (\$25) penalty. In addition, if the return is not filed within thirty (30) days after such return is due, a penalty equal to twenty percent (20%) of the tax determined to be due will be imposed with respect to the personal property which should have been reported on the return. No return shall be considered due within the meaning of this article until the expiration of a period of any extension of time which may have been granted pursuant to section 3 of this rule. (See example of application of late filing penalties.)

(d) **Undervaluation penalty.** If the total assessed value that a person reports on a personal property return is less than the total assessed value that the person is required by law to report and if the amount of the undervaluation exceeds five percent (5%) of the value that should have been reported on the return, then the county auditor shall add a penalty of twenty percent (20%) of the additional taxes finally determined to be due as a result of the undervaluation.

The purpose of the twenty percent (20%) penalty is to ensure a complete disclosure of all information required by the state board on the prescribed self-assessment personal property form(s). This enables the township assessor, county board of review, and state board to carry out their statutory duties of examining returns each year to determine if they substantially comply with the rules of the state board. This examination cannot take place if all required information is not shown on the self-assessment return form.

It is not the purpose of this provision to impose a penalty on a person who has made a complete disclosure of information required on the assessment return form. Therefore, if the person filing the self-assessment personal property return shows that they are claiming an exemption or taking an adjustment for abnormal obsolescence or permanently retired equipment on the return form and has complied with all of the requirements for claiming that exemption or adjustment, no penalty should be added to the extent of the amounts accounted for on the return form. In considering whether or not a taxpayer has made a full and complete disclosure of information, the complete return package must be considered. A complete return package consists of the return form itself (Form 102 or 103) (section 9 of this rule), and all necessary supplemental forms and supporting schedules which must be filed with the return.

If a person has complied with all of the requirements for claiming an exemption or adjustment for abnormal obsolescence or permanently retired equipment, then the increase in assessed value that results from a denial of the exemption or change in the amount of adjustment is considered to be an interpretive difference not subject to the twenty percent (20%) penalty for undervaluation for purposes of this subsection. However, all other amounts not fully disclosed through omission or undervaluation which represent property subject to the reporting requirements of this article and the laws of this state are subject to the twenty percent (20%) penalty.

(1) **Exemptions.** An exemption is defined as a situation where a certain type of property, or the property of a certain kind of taxpayer, is not taxable (IC 6-1.1-1-6).

There are three (3) basic types of exemptions which are permitted to be claimed on the annual business personal property return that are available to a taxpayer. These exemptions include:

- (A) air pollution control equipment;
- (B) industrial waste control equipment; and
- (C) inventory exemptions, including:
 - (i) interstate commerce;
 - (ii) government owned; and
 - (iii) driver's education automobiles.

It should be noted that when the reporting requirements have been met, but for some reason the exemption is not allowed, the amount disallowed is an interpretive difference and is not subject to the omitted or undervalued personal property tax penalty. However, when items that would otherwise qualify for an exemption are omitted from the return, the property is taxable, because the exemption was waived, and the omitted and undervalued personal property tax penalty must be applied.

(2) **Allowable adjustments.** Allowable adjustments can be defined as an adjustment that affects the value of personal property when the adjustment is truly elective. The taxpayer must elect the adjustment when the return is filed. If the taxpayer fails to properly elect the adjustment when the return is filed, the taxpayer is not entitled to the adjustment. The adjustment is not mandatory.

The allowable adjustments are:

- (A) average inventory adjustment; and
- (B) alternative method of valuing inventory.

(3) **Mandatory adjustments.** Mandatory adjustments reflect the value of personal property required to be reported in conformity with the provisions of this article. Therefore, regardless of whether the taxpayer shows the adjustment in their tax return, the assessing official must make the adjustment in order to arrive at the proper value for assessment purposes per the provisions of this article. Permanently retired equipment and abnormal obsolescence are adjustments which should be recognized to the extent that the property qualifies and the taxpayer is able to substantiate the facts, circumstances, and amount of the claim in order to properly determine the true tax value of the subject property.

- (A) The mandatory adjustments for depreciable assets include:
 - (i) adjust to federal tax basis;
 - (ii) add fully depreciated property still in use but written off;

- (iii) add cost of installation and foundation applicable to depreciable personal property;
- (iv) equipment not placed in service;
- (v) valuation of special tooling;
- (vi) permanently retired equipment;
- (vii) valuation of commercial aircraft and interstate motor truck carriers;
- (viii) abnormal obsolescence;
- (ix) true tax value limited to thirty percent (30%) of adjusted cost;
- (x) true tax value percentage factors applicable to each year's acquisitions;
- (xi) placement by year of acquisition in the proper pool based upon life utilized for computing cost recovery (depreciation) for federal tax purposes; and
- (xii) assessment ratio of thirty three and one third percent (33 1/3%) of true tax value.

(B) The mandatory adjustments for inventory include:

- (i) adjust book inventory to March 1;
- (ii) add unrecorded inventory;
- (iii) adjust to "first in first out" (FIFO);
- (iv) add manufacturing overhead not included in inventory;
- (v) add allocable costs of wholesalers or retailers not included in inventory;
- (vi) add freight in not included in inventory;
- (vii) add royalties, editorial, license, or copyright fees not included in inventory;
- (viii) add taxes not included in inventory;
- (ix) deduct inventory recorded but not received;
- (x) deduct purchase or trade discounts;
- (xi) adjustment from standard to actual cost;
- (xii) abnormal obsolescence;
- (xiii) thirty five percent (35%) valuation adjustment if the alternative method is not elected; and
- (xiv) assessment ratio of thirty three and one third percent (33 1/3%) of true tax value.

With the exception of the valuation of permanently retired equipment and abnormal obsolescence, mandatory adjustments for depreciable assets and inventory are not interpretive differences. They are adjustments which must be applied to any omitted or undervalued property when discovered. Any resulting differences in assessment between the amount reported by the taxpayer and the amount of assessment determined by the assessing official after making all mandatory adjustments is subject to the twenty percent (20%) penalty, while interpretive differences and math errors on the face of the return are not subject to the penalty. The penalty shall be added to the property tax installment next due for the return on which the property was undervalued.

(e) Late payment penalty. (1) A taxpayer shall begin paying a "late payment penalty" on the day after the date for payment described above if they have not paid the amount of taxes resulting from the action or determination and they either:

(A) received notice of the taxes they are required to pay as a result of the action or determination at least thirty (30) days before the date for payment; or

(B) voluntarily signed and filed an assessment return for the taxes.

(2) If subdivision (1) does not apply, a taxpayer who has not paid the amount of taxes resulting from the action or determination shall begin paying the "late payment penalty" on:

(A) the next May 10 which follows the date for payment described above; or

(B) the next November 10 which follows the date for payment described above;

whichever occurs first.

(f) A penalty is due with an installment under subsection (b), (c), or (d) whether or not an appeal is filed under IC 6-1.1-15-5 with respect to the tax due on that installment.

(g) Example of application of late filing penalties.

Assessment added June 28, 19X1 (Assume no extension granted, no return filed)	\$10.00 0
Tax (\$10,000 — \$10.00 tax rate)	\$1,000
Less property tax replacement credit	200
Net amount of tax	\$800
Penalties	

Return not filed on or before due date (flat penalty)	\$25	
No return filed within thirty (30) days of due date (twenty percent (20%) of tax)	160	
Total penalties		<u>185</u>
Total due		<u>\$ 985</u>
Amount due May 10, 19X2: one-half (1/2) of net taxes due	\$400	
Penalties	<u>185</u>	
Total		<u>\$ 585</u>
Amount due November 10, 19X2: one- half (1/2) of net taxes due		<u>\$ 400</u>

This type of penalty shall be added to the property tax installment next due. The penalty may not be divided into two (2) installments.

(h) Example of application of undervaluation penalty:

Correct assessed value of all personal property, March 1, 19X1	\$51,560	0	
Assessed value of personal property per return filed April 17, 19X1	41,560

Net amount of additional tax due			<u>\$ 640</u>
Increase in assessed value of personal property	\$10,00	0	
Less assessed value of interpretive difference, exempt inventory claimed on the return by the taxpayer not allowed: (\$23,080 cost \times sixty-five percent (65%) = \$15,002 TTV) (\$15,002 TTV \div 3 = assessed value)	5,000		
Assessed value subject to omitted or undervalued penalty (exceeds five percent (5%) of correct value)	<u>\$ 5,000</u>		
Amount of additional tax due relative to assessed value subject to penalty (\$5,000 \times \$8.00 tax rate)			\$400
Less property tax replacement credit			<u>80</u>
Net amount of additional tax due relative to assessed value subject to penalty			<u>\$ 320</u>
Twenty percent (20%) penalty on taxes finally determined with respect to omitted or undervalued property (\$320			<u>\$ 64</u>

<input type="checkbox"/> twenty percent (20%))

twenty percent (20%) penalty (above)	64	
Total		\$ 224
Amount due November 10, 19X2: one-half (1/2) of net additional tax due		\$ 160

This type of penalty shall be added to the property tax installment next due. The penalty may not be divided into two (2) installments.
(e) Claims for deductions, exemptions, abnormal obsolescence, permanently retired equipment, and mathematical errors on the face of the return are excluded from the 5% undervaluation threshold of subsection (d).

(d) The department may hold an administrative hearing or appoint personnel to hold an administrative hearing at its discretion provided that the taxpayer has properly requested a hearing and the department determines that the taxpayer's facts and circumstances warrant an administrative hearing. SECTION 18. 50 IAC 4.2-4-1 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-4-1 "Depreciable personal property" defined

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-1-11

Sec. 1. In general, "depreciable personal property" as used in this article is all tangible personal property as defined in 50 IAC 4.2-1-1 (h) that is used in a trade or business, used for the production of income, or held as an investment that should be or is subject to depreciation for federal income tax purposes, except to the extent that property is treated otherwise in this article. In general, except as otherwise provided in this article, personal property will be deemed to become depreciable property when a depreciation deduction is allowable for federal income tax purposes. *(Department of Local Government Finance; 50 IAC 4.2-4-1; filed Dec 7, 1988, 9:35 a.m.: 12 IR 838, eff Mar 1, 1989; reinstated by IC 6-1.1-3-22, eff Jul 1, 2003)*

SECTION 19. 50 IAC 4.2-4-2 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-4-2 Book cost determinative

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-3

Sec. 2. (a) The cost of depreciable property, both real and personal, as recorded on the taxpayer's books and records, must be utilized in determining the value of the depreciable personal property subject to assessment.

(b) The cost of all depreciable property of a taxpayer shall be the total amount reflected on the books and records of the taxpayer as of the assessment date except as provided in section 3 of this rule.

Per the provisions of this article and the Internal Revenue Code, ~~effective January 1, 1987,~~ the cost of depreciable personal property must include, but not be limited to direct costs and an appropriate portion of indirect costs attributable to its production or acquisition and preparation for use. The cost of machinery, furniture, tools, computers (excluding application software), and other plant assets includes all costs necessary to place the asset in condition and in place, ready for use. These costs include, but are not limited to, the purchase price, transportation costs to the place of use, and installation costs, foundations and electrical wiring, interest

incurred during construction and installation, and sales tax. If the asset is constructed by the company, the original cost must be made up of, but not limited to, the following costs:

- (1) direct and indirect labor costs and fringe benefits;
- (2) direct material costs;
- (3) designing;
- (4) supervision;
- (5) insurance;
- (6) depreciation of equipment used in construction;
- (7) claims for damage during construction not compensated for by insurance;
- (8) taxes and insurance during construction;
- (9) interest incurred during construction;
- (10) sales taxes; and
- (11) other costs directly chargeable to construction.

No profit should be added to the actual costs since the company cannot make a profit on itself. Any credits in the form of sales of scrap materials, discounts received on purchases of materials, and return premiums on surrender of insurance policies should be subtracted from the gross costs of construction to determine the actual cost of the asset.

(c) Additions and betterments. The cost of additions and betterments must be added to the original cost of the asset. If an additional part is added or some other change is made in the fixed asset which increases its estimated useful life, its production or efficiency, or changes it to a different use, such an expenditure is a betterment and should be capitalized by adding it to the original cost of the asset. If a part is replaced with a similar part, the new part would be shown as a new acquisition while the part replaced would be removed from the original cost of the asset when acquired. The cost of additions, betterments, or replacements would be reported as an addition, betterment, or replacement in the year the actual expenditure occurred.

(d) In the event a taxpayer cannot determine from ~~their~~ **its** books and records the cost of the depreciable property on the assessment date, they must use:

- (1) the cost per books as of the close of ~~their~~ **its** annual financial period immediately prior to the assessment date and so indicate on their return;
- (2) the book cost as of the close of ~~their~~ **its** last financial period will then be adjusted to reflect all acquisitions and disposals of depreciable property which have occurred between such date and the assessment date;
- (3) this adjustment should be taken as provided in section 4 of this rule; and
- (4) installation costs and foundations applicable to machinery and equipment shall be reported and assessed on the same basis as the asset to which they apply.

(e) Reconciliation. A taxpayer must be able to reconcile the cost of the depreciable personal property reported on the tax returns required to be filed with the cost of all depreciable property as recorded on the taxpayer's books and records on the assessment date. A ~~real and personal property~~ **and real property** guide is included in section 10 of this rule, to assist in the reconciliation. ~~using Form 103-R (50 IAC 4.2-2-9).~~

(f) Multiple location taxpayers. Taxpayers with locations in more than one (1) taxing district in this state may fulfill the requirements of this section by making one (1) computation as required in subsection (e) for the entire state, provided that the cost of the depreciable personal property for each taxing district where the taxpayer has property on the assessment date is identified in such computation. (*Department of Local Government Finance; 50 IAC 4.2-4-2; filed Dec 7, 1988, 9:35 a.m.: 12 IR 839, eff Mar 1, 1989; reinstated by IC 6-1.1-3-22, eff Jul 1, 2003*)

SECTION 20. 50 IAC 4.2-4-3 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-4-3 Fully depreciated, retired, or nominally valued property; computer equipment; report and valuation

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-3

Sec. 3. (a) Depreciable personal property ~~as defined in 50 IAC 4.2-1-1 (h)~~ that has not been retired from use must be reported for personal property assessment purposes whether or not the cost of such property has been removed from the taxpayer's books and records, has been recorded on the taxpayer's books and records, or has been recorded at a nominal value on the taxpayer's books and records.

(b) Restoration of depreciable personal property written off. Any fully-depreciated personal property that has been written off the taxpayer's books and records and is on hand at the tax situs and not permanently retired on the assessment date must be reported in the return. The cost of such property must be clearly shown as an adjustment in the space provided on the tax return as provided in

section 4 of this rule.

(c) Permanently retired depreciable personal property defined. "Permanently retired depreciable personal property" means depreciable personal property that has been removed from the manufacturing process on the assessment date, or has been removed from services other than manufacturing on the assessment date, and is awaiting disposition, and must be scheduled to be scrapped, removed, or disposed of and will be considered to be permanently retired providing the taxpayer actually scraps or sells such property.

Adjustment for permanently retired depreciable personal property. Depreciable personal property that is on hand at the tax situs on the assessment date, included in the cost per books as reported by the taxpayer in ~~their~~ its return, and permanently retired on the assessment date as herein defined, is subject to an adjustment as herein provided if the taxpayer so elects.

Amount of adjustment. The cost per books of permanently retired depreciable property can be taken as an adjustment from book cost of depreciable property on the return provided the cost of such property is included in the cost per books actually reported on the return.

Eligibility. In order to qualify for this adjustment, a taxpayer will need to substantiate that the property was permanently retired and not in use.

(d) Valuation of permanently retired depreciable personal property. Permanently retired depreciable personal property should be valued at its net scrap or net sale value. The valuation of this property should be shown separately on the tax return and will not be subject to the thirty percent (30%) limitation of original cost.

(e) Valuation of depreciable personal property with a nominal value. Depreciable personal property recorded on the books and records at a nominal or no value must be recorded at its actual acquisition cost determined by reference to the insurable value in the year of acquisition for Indiana property tax assessment purposes. This category of property ~~would include~~ includes, but is not be limited to, bulk purchase or the acquisition of a going business concern.

(f) Valuation of computer equipment. Computers are made up of three (3) elements:

- (1) hardware;
- (2) operational software; and
- (3) application software.

Computers (including hardware and operational software), must be reported at the actual acquisition cost regardless of how this property may be valued on the taxpayers books and records.

(g) Computers are made up of the following elements:

- (1) Hardware. Hardware is composed of mechanical, magnetic, electrical, and electronic devices and other components which constitute the physical computer assembly.
- (2) Operational software. The operational program controls the hardware and actually makes the machine operational. It is fundamental and necessary to the functioning of the computer hardware itself and performs such functions as loading, scheduling, supervision, and data management. It represents the internalized instruction codes that translate information into a form usable by the equipment and controls the basic operations of the central processing unit to perform arithmetic and/or logical operations automatically by means of programmed instructions. It is not normally accessible or modifiable by the user.
- (3) Application software. The application program is a written sequence of instructions which details the operations the equipment is to perform in order to achieve a specific objective of the user.

If the value recorded on the books and records reflects charges for customer support services such as educational services, maintenance, or application software that relate to future periods and not to the value of the tangible personal property, such charges may be deducted as nonassessable intangible personal property (to the extent that a separate charge or value can be identified).

(h) The allocation of interest incurred during construction and installation must be made (capitalized) for personal property tax purposes regardless of the fact that Section 263 of the Internal Revenue Code ~~of 1986~~ is not applicable in certain cases.

(Department of Local Government Finance; 50 IAC 4.2-4-3; filed Dec 7, 1988, 9:35 a.m.: 12 IR 840, eff Mar 1, 1989; reinstated by IC 6-1.1-3-22, eff Jul 1, 2003; filed Jul 31, 2006, 8:30 a.m.: 20060830-IR-050050252FRA)

SECTION 21. 50 IAC 4.2-4-4 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-4-4 Adjustments to cost

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-3

Sec. 4. (a) Mandatory adjustment. The adjusted costs of the assessable depreciable personal property as computed in subsection (d), must be reported at the tax basis of such property as defined in ~~Section 1012 of the Internal Revenue Code of 1986~~ unadjusted by Sections 167 (depreciation) and 179 (expense deduction) of that Code or any credits (such as investment tax credit) which diminished

the cost basis of the property. Therefore, if the tax basis of the taxpayer's assessable depreciable personal property is different than the cost per books of such property, except for the depreciable personal property defined and required to be reported by section 3 of this rule, an adjustment must be made to the cost per books of the assessable depreciable personal property reported on the Indiana property tax return. ~~It is important to note that this is a change from the prior requirements for Indiana ad valorem tax purposes in that interest (incurred prior to placement in service) and sales tax specifically are now required to be included as part of the tax basis of depreciable personal property.~~

(b) Reporting on return. The adjustment from book to tax basis must be computed on Form 106 (50 IAC 4.2-2-9), and shown in the taxpayer's return on line 2 of Form 103 - Long Form (50 IAC 4.2-2-9), Schedule A.

(c) Not elective. The adjustment is required to be made regardless of whether it is an increase or decrease of the cost per books.

(d) Computation of adjusted cost. The adjusted cost of depreciable personal property is the resultant amount obtained by adjusting the cost per books, as defined in section 2 of this rule (cost per books), ~~subsection (a) (mandatory adjustments) 50 IAC 4.2-11-4(1) (property not subject to property tax), 50 IAC 4.2-11-5 50 IAC 4.2-11.1-3 (air pollution control system) and 50 IAC 4.2-11-6 50 IAC 4.2-11.1-4 (industrial waste control facility). 50 IAC 4.2-11-8 (other property not subject to this article - real property), and vehicles subject to excise tax.~~

SECTION 22. 50 IAC 4.2-4-5 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-4-5 Pools of property; determination of costs by acquisition year

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-3

Sec. 5. (a) The adjusted cost of depreciable personal property as computed in section 4 of this rule, is required to be segregated for Indiana property tax purposes into four (4) separate pools. The depreciable life utilized for federal income tax purposes determines the pool to be utilized for Indiana property tax purposes. The pools to be utilized for Indiana property tax purposes are as follows:

- (1) Pool No. 1: All assets which have a life of one (1) through four (4) years for federal income tax purposes.
- (2) Pool No. 2: All assets which have a life of five (5) through eight (8) years for federal income tax purposes.
- (3) Pool No. 3: All assets which have a life of nine (9) through twelve (12) years for federal income tax purposes.
- (4) Pool No. 4: All assets which have a thirteen (13) years or longer life for federal income tax purposes.

EXAMPLE

A taxpayer has adjusted cost of depreciable personal property as determined in section 4 of this rule, in the amount of one hundred thousand dollars (\$100,000). For federal income tax purposes the taxpayer uses a composite method of computing depreciation with three (3) separate composite accounts as follows:

- (1) a four (4) year account for transportation equipment: twenty thousand dollars (\$20,000);
- (2) a ten (10) year account for office furniture and fixtures: fifteen thousand dollars (\$15,000); and
- (3) a twelve (12) year account for all other depreciable personal property: sixty five thousand dollars (\$65,000).

For Indiana property tax purposes, the transportation equipment would be includable in Pool No. 1 and the balance of the adjusted cost of depreciable personal property would fall in Pool No. 3. For illustrative purposes the breakdown would be as follows:

Pool No. 1	\$20,000
Pool No. 3	\$80,000
TOTAL	\$100,000

(b) Useful life. The useful life used to determine the proper classification of the pool in which an asset must be included is to be based upon the actual life utilized to compute depreciation on the federal income tax return of the taxpayer unless:

- (1) The ~~state board~~ **department** determines that such life is either unrealistic in relation to all of the taxpayer's facts and circumstances or when the life used on the federal tax return has been changed by the Internal Revenue Service on audit.
- (2) The useful lives utilized by taxpayers in the state for a particular category of assets are varied and the ~~state board~~ **department**, in order to obtain equalization in assessments, determines that a uniform life should be used by all such taxpayers in the state, the ~~state board~~ **department** may prescribe the useful life of such assets for all of these taxpayers in the state pursuant to 50 IAC 4.2-7-2.

(Department of Local Government Finance; 50 IAC 4.2-4-5; filed Dec 7, 1988, 9:35 a.m.: 12 IR 841, eff Mar 1, 1989; reinstated by IC 6-1.1-3-22, eff Jul 1, 2003)

SECTION 23. 50 IAC 4.2-4-6 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-4-6 Determination of the year of acquisition

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-3

Sec. 6. (a) After the allocation of adjusted cost of depreciable tangible personal property, as provided in section 5 of this rule, it will be necessary to determine the cost by year of acquisition for each pool. The number of years which ~~that~~ are required to be segregated by year of acquisition will depend upon the particular pool.

(b) Each pool is required to be segregated as follows:

(1) Pool No. 1 requires the cost to be determined by year of acquisition for the three (3) years immediately preceding the assessment date. The balance of the cost of the assets in this pool will be includable in the fourth category.

(2) Pool No. 2 requires the cost by year of acquisition be determined for the six (6) years preceding the assessment date. The balance of the cost would be includable in the seventh category.

(3) Pool No. 3 requires that cost by year of acquisition be determined for the ten (10) years preceding the assessment date. The balance of such account would be includable in the eleventh category.

(4) Pool No. 4 requires that the cost by year of acquisition be determined for the twelve (12) years preceding the assessment date with the balance of the cost of such pool includable in the thirteenth category.

(c) Reporting year. The year of acquisition for Indiana property tax purposes is a fiscal year March 2 to March 1 unless the taxpayer elects to use the same year as that utilized for federal tax purposes.

(1) If a taxpayer has a financial year that ends on December 31 or January 31, the taxpayer may elect to use the same year as that used for federal income tax purposes to determine the year of acquisition of assets for Indiana property tax reporting purposes. Otherwise, a taxpayer is not eligible to elect to use a federal year to compute year of acquisition for Indiana personal property tax purposes and must use a fiscal year of March 2 to March 1.

(2) If a federal tax year election is made, the acquisition made after the close of the taxpayer's federal taxable year to the assessment date must be included in a separate category on the return and clearly designated.

(d) Disposals. For Indiana property tax purposes it will be presumed that the disposal of depreciable personal property occurs on a first-in, first-out basis unless the taxpayer establishes that such was not the case. Therefore, absent evidence to the contrary, all disposals will be deemed to occur from the remaining category in each pool.

EXAMPLE

If a taxpayer, on a December 31 federal year, has twenty thousand dollars (\$20,000) of adjusted cost in Pool No. 1 and eighty thousand dollars (\$80,000), of which four thousand dollars (\$4,000) were purchased in January and February of the assessment year, in Pool No. 3 (see the Example contained in section 5(a) of this rule), such cost figures would be broken down into the year of acquisition as follows, providing the taxpayer makes an election to use federal tax year to compute year of acquisition cost:

	Pool No. 1	Pool No. 3
Jan. 1 to March 1, 1989	\$ None	\$ 4,000
1988	3,000	12,000
1987	4,000	10,000
1986	None	2,000
1985	13,000*	4,000
1984		1,000
1983		None
1982		5,000
1981		30,000
1980		12,000
TOTALS	<u>\$20,000</u>	<u>\$80,000</u>

*Includes the year indicated and all depreciable personal property on hand which was acquired in years prior to the year indicated.

SECTION 24 50 IAC 4.2-4-8 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-4-8 Adjustment for obsolescence

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-3

Sec. 8. (a) A taxpayer may claim an adjustment for abnormal obsolescence as defined in 50 IAC 4.2-9-3, on business personal property provided that such taxpayer follows the procedures and meets the requirements regarding an adjustment for abnormal obsolescence contained in 50 IAC 9. It includes the impairment of desirability and usefulness brought about by new inventions and improved processes for production, or the impairment of functional capacity or efficiency if the inadequacy or over adequacy ~~cause~~ **causes** a loss in value and ~~have~~ **has** made the property incapable of continued use for a prolonged period during the assessment year.

(b) Limitation. No adjustment will be allowed for normal obsolescence as defined in 50 IAC 9. The table to determine true tax value, as provided in section 7(b) of this rule, automatically makes allowance for this type of obsolescence. The values arrived at as a result of this table reflect the application of the double declining balance depreciation method to the point where straight line depreciation would be more beneficial to the taxpayer. This accelerated depreciation, and use of a short useful life and historical cost reflect any physical, functional, or economic obsolescence except to the extent that these items qualify for abnormal obsolescence as defined.

(c) Eligibility. The term "abnormal obsolescence" will be strictly construed and be limited to a situation where unforeseen changes in market values, exceptional technological obsolescence, or destruction by catastrophe occurs, providing that such events have a direct effect upon the valuation of the depreciable personal property of the taxpayer on a going concern basis at the tax situs in question.

(d) Adjustment. The dollar amount of the adjustment for the depreciable personal property pursuant to this section in no event can exceed the tentative true tax value as computed in section 7 of this rule, for the specific unit or units of depreciable personal property on which the taxpayer claims the adjustment. If the property has been incapable of continued use for a prolonged period during the assessment year, for a reason identified as qualifying for abnormal obsolescence, it will be eligible for an adjustment to be computed as follows:

(1) If the cost-to-cure the cause of the abnormal obsolescence is equal to or less than the anticipated increase in utility, and hence value, it is economically feasible to repair or replace the impaired item and is thus deemed curable. The dollar amount of the cost-to-cure shall be the basis for determining the amount of abnormal obsolescence.

(2) If the cause of the impairment cannot be corrected, or the cost-to-cure the cause of abnormal obsolescence is in excess of its contribution to the value of the property, it shall be deemed to be incurable. The amount of adjustment therefore shall be based upon the scrap or salvage value of the affected item, and shall be limited to the true tax value before adjustment for abnormal obsolescence of the affected item itself.

EXAMPLE 1

Taxpayer ABC has depreciable personal property qualifying for an adjustment for abnormal obsolescence. The cost-to-cure the cause of the abnormal obsolescence is eight hundred thousand dollars (\$800,000), and is less than the anticipated benefits to be obtained from the use of the affected asset. The depreciable asset has an adjusted basis of six million five hundred thousand dollars (\$6,500,000), and an acquisition date and depreciable life which result in a true tax value factor of twenty percent (20%) (the total true tax value, of all of ABC's depreciable personal property in this taxing district, computed by the application of the prescribed pool percentages is greater than thirty percent (30%) of the total adjusted cost). The taxpayer should compute the abnormal obsolescence adjustment as follows:

Reported basis of asset		\$6,500,00
Qualifying for abnormal		0
Obsolescence adjustment		
Prescribed true tax	x	20%
Valuation factor		
True tax value of item		\$1,300,00

Line 68, Schedule A, Form 103		
<hr/>		
True tax value of item		\$1,140,00
		0
<hr/>		

In no instance may the adjustment for abnormal obsolescence exceed the true tax value of the affected item prior to such adjustment, or result in a true tax value less than the scrap or net realizable value of the affected asset.

EXAMPLE 2

Taxpayer XYZ has depreciable personal property qualifying for an adjustment for abnormal obsolescence. The cost-to-cure the cause of the abnormal obsolescence is four hundred sixty thousand dollars (\$460,000), and exceeds the benefits expected from any further use of the affected asset. The depreciable asset has an adjusted basis of two million three hundred thousand dollars (\$2,300,000) and an acquisition date and depreciable life which result in a tentative true tax value factor of twelve percent (12%) (the total true tax value, of all of XYZ's depreciable personal property in this taxing district, computed by the application of the prescribed pool percentages is less than thirty percent (30%) of the total adjusted cost). The taxpayer is able to demonstrate that the salvage value of the affected item is seventy-two thousand dollars (\$72,000). The taxpayer should compute the adjustment as follows:

Reported basis of asset	\$2,300,00
Qualifying for abnormal	0
Obsolescence adjustment	
Prescribed true tax	
Valuation factor	x 30%

SECTION 25. 50 IAC 4.2-4-9.1 IS ADDED TO READ AS FOLLOWS:

50 IAC 4.2-4-9.1 Election of valuation method for special integrated steel mill or oil refinery/petrochemical equipment

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-3-23

Sec. 9.1. (a) For purposes of this section:

- (1) "adjusted cost" refers to the adjusted cost established in 50 IAC 4.2-4-4;
- (2) "depreciable personal property" has the meaning set forth in 50 IAC 4.2-4-1;
- (3) "integrated steel mill" means a person, including a subsidiary of a corporation, that produces steel by processing iron ore and other raw materials in a blast furnace in Indiana;
- (4) "oil refinery/petrochemical company" means a person that produces a variety of petroleum products by processing an annual average of at least one hundred thousand (100,000) barrels of crude oil per day;
- (5) "permanently retired depreciable personal property" has the meaning set forth in 50 IAC 4.2-4-3;
- (6) "pool" refers to a pool established in 50 IAC 4.2-4-5(a);
- (7) "special integrated steel mill equipment" or "oil refinery/petrochemical equipment" means depreciable personal

property, other than special tools and permanently retired depreciable personal property:

(A) that:

(i) is owned, leased, or used by an integrated steel mill or an entity that is at least fifty percent (50%) owned by an affiliate of an integrated steel mill; and (ii) falls within Asset Class 33.4 as set forth in IRS Rev. Proc. 87-56, 1987-2, C.B. 647; or

(B) that:

(i) is owned, leased, or used as an integrated part of an oil refinery/petrochemical company or its affiliate; and

(ii) falls within Asset Class 13.3 or 28.0 as set forth in IRS Rev. Proc. 87-56, 1987-2, C.B. 647;

(8) "year of acquisition" refers to the year of acquisition determined under 50 IAC 4.2-4-6.

(b) Notwithstanding 50 IAC 4.2-4-4, 50 IAC 4.2-4-6, and 50 IAC 4.2-4-7, a taxpayer may elect to calculate the true tax value of the taxpayer's special integrated steel mill equipment or oil refinery/petrochemical equipment by multiplying the adjusted cost of that equipment by the percentage set forth in the following table:

Year of Acquisition	Percentage
1	40%
2	56%
3	42%
4	32%
5	24%
6	18%
7	15%
8 and older	10%

(c) The department shall designate the table under subsection (b) as "Pool No. 5" on the business personal property tax return.

(d) The percentage factors in the table under subsection (b) automatically reflect all adjustments for depreciation and obsolescence, including abnormal obsolescence, for special integrated steel mill equipment or oil refinery/petrochemical equipment. The equipment is entitled to all exemptions, credits, and deductions for which it qualifies.

(e) The minimum valuation limitations under 50 IAC 4.2-4-9 do not apply to special integrated steel mill equipment or oil refinery/petrochemical equipment valued under this section. The value of the equipment is not included in the calculation of that minimum valuation limitation for the taxpayer's other assessable depreciable personal property in the taxing district.

(f) An election to value special integrated steel mill equipment or oil refinery/petrochemical equipment under this section:

(1) must be made by reporting the equipment under this section on a business personal property tax return;

(2) applies to all of the taxpayer's special integrated steel mill equipment or oil refinery/petrochemical equipment located in the state (whether owned or leased, or used as an integrated part of the equipment); and

(3) is binding on the taxpayer for the assessment date for which the election is made. The department shall prescribe the forms to make the election available. Any special integrated steel mill equipment or oil refinery/petrochemical equipment acquired by a taxpayer that has made an election under this section is valued under this section.

(g) If fifty percent (50%) or more of the adjusted cost of a taxpayer's property that would, notwithstanding this section, be reported in a pool other than Pool No. 5 is attributable to special integrated steel mill equipment or oil refinery/petrochemical equipment, the taxpayer may elect to calculate the true tax value of all of that property as special integrated steel mill equipment or oil refinery/petrochemical equipment. The true tax value of property for which an election is made under this subsection is calculated under subsections (b) through (f).

Sec. 1. (a) ~~Inventory subject to tax.~~ As used in this article, "inventory" means the aggregate of those elements of cost incurred to acquire or produce items of ~~tangible~~ personal property as defined in 50 IAC 4.2-1-1 (h) which are:

- (1) held for sale in the ordinary course of business;
- (2) are currently in the process of production for subsequent sale;

(2) Improvements to real property. Improvements to real property that are personal property include, but are not limited to, personal property attached to the real property to the extent such items are related to activities or processes conducted in the building if the personal property is an integral part of such activity. For example, improvements to real property would include shelving, bins, counters, and related items; non-permanent partitions; supplemental heating and air conditioning; extraordinary lighting; electrical and plumbing facilities; carpeting and draperies.

(c) Reporting. The taxpayer must report and value the property for personal property assessment purposes and in the same manner as any other depreciable personal property which they may own in accordance with provisions of 50 IAC 4.2-4.

50 IAC 4.2-8-7 Valuation; base year value defined

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-3

Sec. 7. (a) The base year value of the leased or rented property plus freight and installation costs must be utilized in determining the value of leased or rented property subject to assessment.

(b) "Base year value" means the amount, measured in money, that a willing buyer in an arm's length transaction would pay to acquire the item of tangible personal property subject to the lease under consideration at the time the lease or bailment was first consummated. For purposes of applying this definition to a specific factual situation, the amount stated in the agreement as the amount which the lessee would have had to pay to acquire the leased property instead of leasing the property will be deemed to be the base year value, provided that the ~~state board department~~ does not determine that such amount is unrealistically low in relation to the other terms contained in the agreement.

(c) If an alternative acquisition cost is not shown in the lease agreement, the base year value will be the factory delivered price for

the tangible personal property subject to the lease plus freight, installation costs, and a profit factor.

(d) If the factory delivered price cannot be determined, the base year value will be the present value of the lease payments at the inception of the lease computed in accordance with 50 IAC 4.2-15-14.

(e) If the present value of the lease payments cannot be determined, the following alternative factors will be used to determine the base year value:

- (1) the insurable value in the year the lease was first consummated; or
- (2) the capitalized value at eight (8) times the annual lease or rental payments.

(f) If the ~~state board~~ **department** issues an instructional bulletin or administrative adjudication prescribing the base year value of certain property pursuant to 50 IAC 4.2-7-1, such prescribed value shall be the base year value of the property.

50 IAC 4.2-9-3 "Abnormal obsolescence" defined

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-31-7

Sec. 3. (a) "Abnormal obsolescence" means ~~as *is*~~ that obsolescence which occurs as a result of factors over which the taxpayer has no control and is unanticipated, unexpected, and cannot reasonably be foreseen by a prudent businessman prior to the occurrence. It is of a nonrecurring nature and includes unforeseen changes in market values, exceptional technological obsolescence, or destruction by catastrophe that has a direct effect upon the value of the personal property of the taxpayer at the tax situs in question on a going concern basis.

(b) Example of unforeseen change in market value: A government ban on the sale of a drug or chemical due to a new discovery or determination may cause that item or the production equipment used to produce it to be abnormally obsolete. A specific example of this would be cyclamate. In this case the equipment used to produce it may be eligible for abnormal obsolescence, ~~while the inventory (cyclamate) should be valued at the lower of cost or market as provided in 50 IAC 4.2-5-3 through 50 IAC 4.2-5-8.~~

(c) Example of exceptional technological obsolescence: Abnormal obsolescence due to exceptional technological obsolescence should be recognized to the extent that it causes the subject property to be incapable of use for current production or adaption to a different use. The invention of a newer, more productive piece of equipment which would produce a better quality item or utilization of state of the art technology that produces more efficiently at a lower cost of production does not cause an older, currently used asset to be considered abnormally obsolete. If the asset is still capable of performing the function for which it was acquired, and is producing both on and before the assessment date, no adjustment shall be allowed. The use of historical cost, short useful life, and accelerated depreciation in developing the prescribed true tax value percentages result in an equitable assessment on the property in question.

(d) Example of destruction by catastrophe: Abnormal obsolescence due to catastrophe should be recognized to the extent that it has a direct effect on the value of a particular item. Property which has been destroyed or damaged by catastrophe as of the assessment date would qualify for such an adjustment. A chemical or production process which, due to an irreparable malfunction, emits a toxic gas or deadly chemical into the outside atmosphere, would qualify for such an adjustment to the extent the property is incapable of use.

(e) Example of abnormal obsolescence due to government action: A government order to shut down certain production equipment due to improper emission levels may result in abnormal obsolescence if the cost to cure the delinquent equipment results in incurable obsolescence, i.e., the cost-to-cure exceeds the contribution or increase in value of the impaired item or the impairment cannot be corrected.

taxpayer is able to substantiate the facts, circumstances, and amount of the claim in order to properly determine the true tax value of the subject property.

(b) A taxpayer wishing to claim an adjustment for abnormal obsolescence must provide documentation of the resulting valuation of the personal property at the tax situs in question on the assessment date on a going concern basis.

(c) The adjustment for abnormal obsolescence must be computed in accordance with this rule, and 50 IAC 4.2-4-8, ~~50 IAC 4.2-5-14~~, 50 IAC 4.2-8-10, or 50 IAC 4.2-10-4.

Sec. 6. No adjustment will be allowable for normal obsolescence. The methods of valuation of business tangible personal property automatically reflect this type of obsolescence by ~~providing a thirty five percent (35%) valuation adjustment on inventory and the use of~~ using historic cost, short depreciable life, and accelerated depreciation on depreciable assets. An adjustment for abnormal obsolescence will be allowed provided a taxpayer can substantiate abnormal obsolescence. Sec. 7. (a) The taxpayer may, prior to the filing of the property tax return for the year in question, petition the ~~state board department~~ pursuant to 50 IAC 4.2-1-6, for an administrative adjudication determination regarding an abnormal obsolescence adjustment. If this determination is granted, it will be effective only for the tax year in question and will not be effective for subsequent assessments.

(b) Reporting on return. If an administrative adjudication determination is obtained, a copy of the determination is required to be attached to the tax return claiming the adjustment. If the taxpayer has not requested an administrative adjudication determination, they may, ~~providing~~ if their circumstances meet the requirements contained herein, request an adjustment on the form prescribed by the ~~state board department~~ when filing the tax return for the year in question. The adjustment(s), if requested, must:

(1) identify specifically all property for which an adjustment is requested;

(2) indicate the original cost of the property;

(3) indicate the true tax value of the property if no adjustment would be allowed; ~~and~~

(4) indicate the true tax value of the property as a result of the requested adjustment; ~~and~~

(5) indicate that the market value was established in conformance with the Uniform Standards of Professional Appraisal Practice (USPAP), which identifies the amount of the adjustment as the true tax value less the market value.

50 IAC 4.2-10-1 Valuation of carriers' property

Authority: IC 6-1.1-31-1

Sec. 1. In general, commercial airlines and ~~interstate motor truck carriers~~, commercial buslines, as herein defined in 50 IAC 4.2-

10-2 and 50 IAC 4.2-10-3, are required to must compute the true tax value of aircraft and transportation equipment required to be reported for the Indiana personal property assessment purposes in accordance with the provisions of 50 IAC 4.2-4. However, if such property is leased, the tentative true tax value is required to be computed in accordance with 50 IAC 4.2-8. The tentative true tax value thus computed is then subject to allocation as provided herein.

(Department of Local Government Finance; 50 IAC 4.2-10-1; filed Dec 7, 1988, 9:35 a.m.: 12 IR 865, eff Mar 1, 1989; reinstated by IC 6-1.1-3-22, eff Jul 1, 2003)

SECTION 44. 50 IAC 4.2-10-2 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-10-2 Commercial airlines; allocation and tax value of aircraft

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-31; IC 6-6-6.5

Sec. 2. (a) In general, commercial airlines ~~are required to~~ **must** value the aircraft required to be reported for Indiana property tax purposes pursuant to section 1 of this rule.

(b) "Commercial airlines" means an airline with regularly scheduled flights and routes authorized and approved by the federal aeronautics administration.

(c) Aircraft property required to be reported. In general, commercial airlines are required to report the total value of the fleet of aircraft operating in this state. For this purpose the commercial airline is required to report the value of all aircraft which it owns or operates of the type of aircraft operating in the taxing district. For example, if the airline owns or operates twenty (20) aircraft of type "x", ten (10) aircraft of type "y", and five (5) aircraft of type "z" and only type "x" aircraft are operated in the taxing district, the commercial airline is required to determine the tentative true tax value of all type "x" aircraft in its fleet of aircraft as provided in section 1 of this rule, and report the value of all type "x" aircraft on its personal property tax return.

(d) Allocation. The value of the aircraft required to be reported for Indiana property tax purposes is subject to allocation. This allocation must be made for each type of aircraft operated. The allocation factor for each type of aircraft is computed by dividing the total ground time of each type of aircraft for the preceding twelve (12) months in the taxing district by the total ground time of each type of aircraft operated in the system. In the example provided in subsection (c) the type "x" aircraft would be subject to allocation. The allocation is determined by computing a percentage obtained by dividing the total ground time for the preceding twelve (12) months of all type "x" aircraft in the taxing district by the total ground time for the preceding twelve (12) months of all type "x" aircraft in the fleet.

(e) True tax value. The true tax value of the aircraft is determined by multiplying the percentages as computed in subsection (d) times the tentative true tax value of the aircraft computed in accordance with section 1 of this rule. For example, assume that the type "x" aircraft provided in the example in subsection (c) had a tentative true tax value of twenty million dollars (\$20,000,000). Furthermore, assume that the percentage determined in subsection (d) was five percent (5%). The true tax value of the aircraft for Indiana property tax purposes would be one million dollars (\$1,000,000).

EXAMPLE

ABC Airline (a commercial airline) owns or operates twenty type "X" aircraft, ten (10) type "Y", and five (5) type "Z". Only type "X" aircraft are operated in the taxing district for which the return is prepared. ABC is required to report the true tax value of the twenty (20) type "X" aircraft.

The total ground time in the taxing district during the twelve (12) months preceding the assessment date for all of ABC's type "X" aircraft was thirty-six thousand (36,000) minutes. The total ground time during the same period for all type "X" aircraft in ABC's fleet was seven hundred and twenty thousand (720,000) minutes. The allocation factor is five percent (5%) ($36,000/720,000$).

The tentative true tax value per section 1 of this rule, of the twenty (20) type "X" aircraft operated by ABC is twenty million dollars (\$20,000,000).

The true tax value to be reported by ABC in this taxing district of the twenty (20) type "X" aircraft is one million dollars (\$1,000,000) ($\$20,000,000 \times 5\%$).

50 IAC 4.2-10-3.1 Commercial busline; allocation and true tax value

Authority: IC 6-1.1-31-1

Affected: IC 6-1.1-1-11

Sec. 3.1. (a) As used in this rule, "commercial busline" means a company for hire that is principally engaged in the business of transporting persons by bus, and exclusively operates charter buses, which do not have scheduled routes.

(b) The fleet of the commercial busline includes the buses the taxpayer owns, holds, possesses, or controls that are used and operated in interstate commerce.

(c) The fleet of the commercial busline is required to be valued pursuant to section 1 of this rule.

(d) The allocation factor for the fleet is computed by dividing the total Indiana miles of the fleet for the preceding twelve (12) months by the total miles of the fleet for the same period.

(e) As an alternative to maintaining a mileage log of all trips, individual lessors, who do not maintain adequate records to compute their allocation factor, may use the same allocation factor as their lessee provided that the lessor's property is predominantly leased to that lessee. The lessor must meet the predominant use requirement in order to use the lessee's allocation factor. If the lessor does not meet the predominant use requirement, the lessor must use the actual allocation factor as determined in subsection (d). As used in this section, "predominant use" means:

(1) during the course of the year, more than fifty percent (50%) of the total mileage logged by the lessor's buses is logged by buses under lease to that lessee; or

(2) during the course of the year, the leased property is leased to that lessee for more than one-half (½) the number of days in that year.

(f) The total true tax value of the fleet subject to assessment under this section is determined by multiplying the true tax value as determined in section 1 of this rule, by the allocation factor determined in subsection (d) or (e). (*Department of Local Government Finance; 50 IAC 4.2-10-3.1*)

(a) Commercial airlines ~~and interstate motor truck carriers~~ **and the buses of commercial buslines used and operated in interstate commerce** may claim an adjustment for abnormal obsolescence, as defined in 50 IAC 4.2-9-3, on the tangible personal property reported pursuant to this section, ~~provided that if~~ the taxpayer follows the procedures and meets the requirements regarding an adjustment for abnormal obsolescence contained in 50 IAC 4.2-9.

(b) Limitation. No adjustment will be allowed for normal obsolescence as defined in 50 IAC 4.2-9. The determination of the tentative true tax value pursuant to 50 IAC 4.2-4, automatically makes an allowance for this type of obsolescence.

(c) Eligibility. The term abnormal obsolescence will be strictly construed and limited to a situation where unforeseen changes in market values, exceptional technological obsolescence, or where destruction by a catastrophe occurs ~~providing that if~~ such events have a direct effect upon the valuation of the property at the tax situs in the state of Indiana.

(d) Adjustment. The dollar amount of the adjustment ~~in no event can~~ **may not** exceed the allocatable portion of the true tax value of the particular unit of property as determined pursuant to this section for which the carrier claims an adjustment.

(1) continues to use the equipment in compliance with any standards established; and

(2) files Form 103-ERA required by this section.

(g) The amount of the deduction for the new owner is the percentage that would have applied if the ownership of the property had not changed multiplied by the current assessed value of the equipment for the year the deduction is claimed by the new owner.

(f) A person may appeal a determination of the assessor under subsection (d) to deny or alter the amount of the deduction by requesting in writing a preliminary conference with the assessor not more than forty-five (45) days after the assessor gives the person notice of the determination. 50 IAC 4.2-15-7 Assessment of; marketing equipment of refined petroleum products
 Authority: IC 6-1.1-31-1
 Affected: IC 6-1.1-3

Sec. 7. (a) Under 50 IAC 4.2-7-1 the following procedures will be utilized by the ~~state board~~ **department** to determine the prices to be used for the assessment of certain marketing equipment of petroleum products.

(b) ~~The products covered by this section include crude oil, natural gas, grease, gasoline (all grades), motor oil (all grades), LP gas, and distillate fuel. Distillate fuel includes kerosene, fuel oil, tractor fuel, jet fuel, and diesel fuel.~~

(c) ~~The price to be utilized for the valuation of crude oil and other petroleum products will be based upon commodity prices reported in the Oil Daily, Oil and Gas Journal, and the Wall Street Journal as of March 1 of the assessment year. Since these prices must be as of March 1 of each assessment year, we will issue the actual prices for each of these commodities shortly after March 1 of the assessment year.~~

(d) ~~Inventories of these commodities at the refinery will be valued at the total cost pursuant to 50 IAC 4.2-5 while inventories of these same items at the other levels of trade, namely the terminal, bulk plant, and retail stations will be valued to include the sum of the applicable expenditures and charges directly or indirectly incurred to bring these items to their existing condition and location as of the assessment date.~~

(e) ~~All petroleum prices shall be listed in the return at the prices adopted by the state board less the normal thirty-five percent (35%) valuation adjustment as provided in 50 IAC 4.2-5-13 and assessed at thirty-three and one-third percent (33 1/3%) of that value.~~

SECTION 52 50 IAC 4.2-15-8 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-15-8 Assessment of leased data processing equipment
 Authority: IC 6-1.1-31-1
 Affected: IC 6-1.1-3

Sec. 8. (a) In recognition of the fact that certain intangible charges may be included in the base year value of the subject equipment, the board has authorized the following adjustment procedure:

(1) Base year value for leased data processing equipment shall be the current commercial published selling price for new equipment.

(2) If the current selling price as defined in subdivision (1) includes charges for one (1) or more of the following customer support services, such charges shall be allowable as an adjustment to base year value in Column B, Form 103 (50 IAC 4.2-2-9), to the extent that such charges can be segregated from the total selling price, supported by adequate records and such adjustments clearly shown on Form 106 (50 IAC 4.2-2-9). Customer support services shall be limited to:

(A) Educational services. Training and instruction in the use of electronic data processing equipment provided to the user

thereof, such as on site education, classroom instruction, and educational publications.

(B) Maintenance. This would be tests, measurements, replacements, adjustments, and repairs intended to keep data processing equipment in satisfactory working condition.

(C) Application software. The application program is a written sequence of instructions which details the operations the equipment is to perform in order to achieve a specific objective of the user.

Any adjustment for the above enumerated purposes must be factually documented by the taxpayer and shall not exceed ten percent (10%) of the total base year valuation of subject equipment.

(b) If there is a question as to the qualification of certain items under this section, the taxpayer may request an administrative adjudication determination pursuant to the provisions of 50 IAC 4.2-1-6. The ~~state board~~ **department** will review each request and issue its determination based upon the facts and evidence submitted by the taxpayer.

(Department of Local Government Finance; 50 IAC 4.2-15-8; filed Dec 7, 1988, 9:35 a.m.; 12 IR 895, eff Mar 1, 1989; reinstated by IC 6-1.1-3-22, eff Jul 1, 2003)

SECTION 53. 50 IAC 4.2-15-14 IS AMENDED TO READ AS FOLLOWS:

50 IAC 4.2-15-14 Present value of personal property leases

Authority: IC 6-1.1-31-1

Affected: IC 6-1-1-3

Sec. 14. Pursuant to 50 IAC 4.2-8-7(d) the ~~board~~ **department** has prescribed the following for the computation of the present value of leased personal property:

(1) If ownership of the property is transferred to the lessee (or may transfer if one (1) of the parties exercises an option) at or before the end of the lease, the term of the lease shall be the term used for computation of the present value.

(2) If title to the property is not transferred to the lessee, the prescribed federal tax depreciable life of the asset at the inception of the lease shall be the term for computing the present value.

(3) If the length of the lease is not specific, the prescribed federal tax depreciable life of the asset at the inception of the lease shall be the term for computing the present value.

(4) If the lease contains a "balloon" or "bubble" payment, such payment must be included in the present value computation. A "balloon" or "bubble" payment is a lump sum payment scheduled at the inception of, during, or at the conclusion of the lease.

(5) If the lease indicates the rate of interest included in the payments, such rate shall be used for computing the present value.

(6) If no interest rate is stated in the lease, the rate to be used in the computation shall be the prime commercial bank loan rate (~~per~~ *Indiana National Bank, Indianapolis*) on the March 1 nearest to the inception of the lease.

The interest rates to be used for March 1 of certain years is ~~set~~ **are** as follows:

Year	Interest Rate	Year	Interest Rate
1988	8.50%	1982	16.50%
1987	7.50%	1981	18.50%
1986	9.50%	1980	16.50%
1985	10.50%	1979	11.75%
1984	11.00%	1978	8.00%
1983	10.50%		
2009	3.25%	2003	4.25%
2008	6.00%	2002	4.75%
2007	8.25%	2001	8.50%
2006	7.50%	2000	8.75%
2005	5.50%	1999	7.75%

2004 4.00% 1998 8.50%

The state board department shall publish subsequent rates annually.

(7) If the amount of any payment(s) (including balloon payments) is not known at the inception of the lease, the present value of the lease payments cannot be computed, and therefore may not be used as the base year value for personal property tax reporting purposes.

(8) If the present value computed in accordance with this section does not result in a reasonable valuation when other facts and circumstances are considered, the computed present value may not be used as the base year value.

EXAMPLE 1

XYZ leased a machine in December, 1982. The term of the lease is seven (7) years, and title to the equipment transfers to XYZ at the end of the lease. The monthly lease payments as stated in the lease are two hundred dollars (\$200) and the option purchase price at the end of the lease is two thousand dollars (\$2,000). The present value of the lease payments at the inception of the lease would be computed as follows:

P (monthly payment) = \$200

i (monthly interest) = 0.875% (10.50%/12)

N (number of payments) = 84 (7 yrs \times 12 mos)

B (balloon payment) = \$2,000

PV of monthly payments + PV of Balloon = \$11,861.92 + 962.08 = \$ 12,824 = Base Year Value of Leased Machine

EXAMPLE 2

ABC leased a piece of equipment in June, 1986. The term of the lease is four (4) years, but title to the property does not transfer to ABC. The prescribed depreciable life of the item for federal tax purposes (in effect at the inception of the lease) was five (5) years. The lease calls for monthly lease payments of one hundred fifty dollars (\$150). The present value of the lease payments at the inception of the lease would be computed as follows:

P = \$150

i = 0.79167% (9.50%/12)

N = 60 (5 \times 12)

PV = \$7,142.22 = Base Year Value of Leased Equipment

(Department of Local Government Finance; 50 IAC 4.2-15-14; filed Dec 7, 1988, 9:35 a.m.; 12 IR 906, eff Mar 1, 1989; reinstated by IC 6-1.1-3-22, eff Jul 1, 2003)
